Frontend architect and technical lead with 10+ years in iGaming — from real-time casino streaming to sportsbook and slots. I own frontend architecture end-to-end, stay ~30% hands-on through reviews and the hard problems, and grow teams that ship polished, performant player experiences. I set technical direction, mentor engineers, and align frontend with design, product, and backend.

HOW I LEAD & BUILD

- **Architecture over frameworks.** Component-driven design, clear module boundaries, and design systems that scale with the team — not just the app.
- **Performance is a feature.** Performance budgets, measured rendering, and smooth real-time UX built in from the start, not bolted on.
- **Quality by construction.** Testable UI, accessibility as a baseline, and a code-review culture that raises everyone's bar.
- **Decisions in the open.** Lightweight RFCs and ADRs, pragmatism over dogma, and choosing boring technology where it counts.
- **Teams ship, not heroes.** Mentoring, healthy developer experience, and tooling as a force multiplier for the whole team.
- **Hands-on leadership.** ~30% in the codebase — reviews and the hard problems — so I lead with credibility.

EDUCATION

Hochschule RheinMain / EASD Escola de Disseny

Degree in Graphic Design · 2011 · Valencia / Wiesbaden

Interactive media, motion, and system design.

Speaker · DjangoCon US 2016

EXPERIENCE

Senior Frontend Software Engineer · MrQ

Sep 2025 — Present · Gibraltar

Ship performant, responsive player-facing features for a real-money casino & slots platform in React/TypeScript. Raise quality through reviews and shared patterns, and fold AI-assisted workflows into how the team builds.

Frontend Architect · Livespins (acquired by Evolution)

Jun 2021 — Jul 2025 · Remote

Owned frontend architecture for a real-time casino game-streaming platform. Set technical direction, built the component and rendering foundations in React/TypeScript, and optimized game-like UI performance across devices.

Frontend Software Engineer · Casumo

Jun 2018 — May 2021 · Remote

Built and maintained a modular, scalable component system across iGaming products; shipped performant player experiences with UX and backend, and mentored on UI patterns.

Senior UI Developer · William Hill

Apr 2017 — May 2018 · Gibraltar

Modernized sportsbook and gaming features; drove accessibility, rendering performance, and visual consistency.

Senior Developer · Rufus Leonard

Jan 2017 — Apr 2017 · London

Delivered frontend for major UK brands with component-driven development.

UX Design & Development Lead · Small Media

Dec 2014 — Dec 2016 · London

Led full-stack development for interactive digital platforms, owning delivery from design through build.

CORE STACK & TOOLS

React · Next.js (App Router / RSC) · TypeScript · Node.js · GraphQL — with Svelte / SvelteKit, Tailwind, Vitest & Playwright, Storybook, CI/CD, and AI-assisted workflows (Copilot, Cursor, Claude Code).
